

P9. Clinical Classes (Taught by local Clinicians, 2-12 weeks)

How do you use? / Comments / Suggestions

- Great opportunity for small group learning and discussion with colleagues and senior clinicians
- Unique opportunity to learn & meet other members of the community
- Important resource for clinicians
- I have done this several times
- Took classes for 4 – 5 years with Stan – awesome
- I have taught seminars – classes
- Those I attended were high quality
- Great opportunity for learning
- Not of use to me but important to others & the development of psychoanalytic thinking in younger members
- Very useful – has been so for me in the past & no doubt will be again
- Did years ago and found it invaluable
- Not in the last 3 years – prior to that yes
- Not recently
- I am not a clinician, thus do not participate in these classes / seminars

- I think this is an area where the Alliance could do a much better job
- Topics don't interest me – Child Therapy is an area I would like to see developed

- I'm taking the 100 hour course through Family Services & it is stellar – That is all of my CEU's for the year - All [your] offerings look very inviting – So I hope to sample them after I've completed this course in May

They interest me – but I don't take the time

- Could be valuable – plan to do in future
- [I'll] make better use of when I'm done with school
- Travel is an obstacle
- Usually I can't attend during the work week
- Classes looked interesting – I couldn't make them work with my schedule
- I've considered several
- Interested but have not attended
- Hard to get to – I work most evenings
- Scheduling is hard
- I hope to be able to schedule these in some day
- I like the opportunity even if I haven't attended
- Have been drawn to courses but struggle to balance available time and commitments
- I might do these as I now have more time
